

Lecture

BY JUN IGARASHI
RIKEN, TOKYO

I would like to announce a talk by my Japanese colleague Jun Igarashi from RIKEN, Tokyo.

Dr. Igarashi is a computational neuroscientist who often collaborates with Markus Diesmann, Tomoki Fukai, Kenji Doya. He is currently a Senior Research Scientist at RIKEN Center for Computational Science High Performance Artificial Intelligence Systems Research Team (Mohamed Wahib lab).

<https://www.r-ccs.riken.jp/en/research/labs/hpaisrt/>

His talk title is: Oscillatory activity in large-scale simulations of connectome-constrained spiking neural network models of the mouse and marmoset cerebral cortex

You are all welcome to join us.

Best regards,
Motoharu
